

**December is National AIDS Awareness Month and in recognition of AIDS Awareness, we are dedicating this month to educating you on this Global epidemic!**

**More than 35.3 million people are currently living with HIV--2.1 million of these are adolescents (10-19 years). We want to stop the spread and encourage you to get the facts, get tested and get involved!**

**We invite you to follow us on Facebook and Twitter where we will be providing you with an array of information and resources all month long.**
